

**Watersheds Coalition of Ventura County IRWMP
Proposition 50 Grant Proposal, Step 2
*Attachment 7: Schedule***

Applicants must submit a schedule showing the sequence and timing of work items presented in the Proposal. The schedule must be consistent with the Work Plan and must show May 1, 2007, as the assumed effective date of the grant agreement. The schedule must show the start and end dates as well as milestones for each work item contained in the Work Plan and should be in a horizontal bar or Gantt chart format. An assumed end date of the grant agreement will not be established by DWR and the State Water Board, instead applicants must include a reasonable estimate of the end date, based on their Proposal including time for any final reports and invoicing.

Work items may overlap. Applicants should show any dependence on predecessors by showing links between work items. If the IRWM PLAN has not been adopted, also include in the schedule the remaining milestones and dates for plan adoption. The schedule does not need to include any post construction monitoring.

For Proposals utilizing a draft IRWM Plan, note any delays in the schedule to adopt the IRWM Plan, paying particular attention to whether the IRWM Plan will be adopted by January 1, 2007.

This Attachment provides an individual schedule for each project as well as a schedule for the preparation of the WCVV IRWM Plan.
